

What is claimed is:

1. An ironing board having an iron rest at the blunt end of the ironing board, wherein the iron rest (3) is mounted on the ironing board (3) as a drawer and is pushable under the ironing board (2) after use.
2. The ironing board as recited in Claim 1, wherein the iron rest (3) is fixable in two pull-out positions.
3. The ironing board as recited in Claim 1 or 2, wherein the iron rest (3) is provided with a connector for a power cord.
4. The ironing board as recited in one of Claims 1 through 3, wherein the connector (4) has a socket for the iron cord (6) and a switch (24) for interrupting the current.
5. The ironing board as recited in one of Claims 1 through 4, wherein the switch is connected to a pilot light.
6. The ironing board as recited in one of Claims 1 through 5, wherein the connector (4) is used as a handle for the displaceable iron rest (3).
7. The ironing board as recited in one of Claims 1 through 6, wherein the iron rest (3) has a recess (5) for passage of the iron cord (6).
8. The ironing board as recited in one of Claims 1 through 7, wherein the iron cord (6) is tensioned by a weight (7) suspended on the cord (6).

9. The ironing board as recited in one of Claims 1 through 8,
wherein the support (10) for the iron has an opening (11) having two support flaps (12) opposite
one another, oriented obliquely to the ironing board plane, and pointing downward.

10. The ironing board as recited in Claim 9,
wherein a third support flap pointing upward and forming an extension of one of the support
flaps (12) is provided.

11. The ironing board as recited in Claim 9 or 10,
wherein the support flaps (12) are articulated via hinges (14) to opposite edges of the opening
(11) and are foldable into the plane of the opening (11).

12. The ironing board as recited in Claim 11,
wherein the support flaps (12) are fixed in the folded-in position.

13. The ironing board as recited in one of Claims 1 through 12,
wherein the iron rest (3) has a rotatable support (20) for the iron.

14. The ironing board as recited in Claim 13,
wherein the support (20) is fixable at any angle.
